SUMMARY

Final-year Computer Science Engineering student with hands-on experience in building full-stack web applications using Python, Flask, MySQL, and MongoDB. Strong foundation in Data Structures & Algorithms, OOP, DBMS, and Python programming, along with exposure to Machine Learning and Generative AI concepts. Familiar with AI tools and concepts such as APIs, LangChain, Hugging Face, RAG, and LLM basics. Certified in Generative AI, Python, and C/C++, with strong problem-solving, communication, and teamwork skills, eager to contribute to real-world AI and software engineering projects.

EDUCATION

B.E. in Computer Science

Dr. D Y Patil College of Engineering, Akurdi, Pune

2023-2027

CGPA: 8.69/10

Higher Secondary Certificate (HSC)

B. P. Patil College of science, Pimpalgaon (B)

2022-2023

Percentage: 88.17%

Secondary School Certificate (SSC)

Gautam Public School, Gautamnagar

2020-2021

Percentage: 89.4%

SKILLS

Languages: Python, C, C++, Java (Basic)

Web development: HTML, CSS, JavaScript, Tailwind CSS, MySQL, MongoDB

AI/ML: Machine Learning Basics, Logistic Regression, Naive Bayes

Libraries: Pandas, NumPy, Matplotlib

Others: Data Structures & Algorithms, OOP, DBMS

Tools: VS Code, Git & GitHub

PROJECTS

Farm Management System

Flask | SQLAlchemy | MySQL

Nov2025 – Jan2026

- Developed a secure web-based application to manage farmer records, agro products, and farming data with role-based authentication and an intuitive user interface.
- Designed and implemented a relational database using SQLAlchemy ORM, enabling efficient CRUD operations, data validation, and reliable backend functionality.
- Improved record management by digitizing manual workflows and ensuring secure, scalable database operations
- Enabled customers to browse products and contact farmers directly.

Yukti – AI Engineering Intelligence Platform

June2026

FastAPI | React | PostgreSQL | LLMs | RAG | Vector Database

- Built an AI-powered platform to analyze software repositories and generate engineering insights.
- Developed AI agents for architecture analysis, technical debt detection, and roadmap generation.
- Integrated LLM-based workflows to provide intelligent recommendations and documentation.
- Live Demo:** <https://yukti-pi.vercel.app/>

CERTIFICATIONS

- Generative AI Professional**, Microsoft & LinkedIn (2025) – LLMs, Prompt Engineering, AI Workflows.
- C & C++ Programming Certification** (2023) – C/C++, OOP, Pointers, Data Structures.
- Python Programming Certification** – Python programming and problem solving.
- SQL & Relational Databases**, Cognitive Class (2026) – SQL, Joins, Database Design.
