SUMMARY

Final-year Computer Science Engineering student at Dr. D Y Patil College of Engineering, Akurdi, with hands-on experience in developing web applications using HTML, CSS, JavaScript, MySQL, and MongoDB. Proficient in Object-Oriented Programming, Data Structures & Algorithms, DBMS, and SQL, with working knowledge of Java and C++. Experienced in building database-driven applications, implementing CRUD operations, and designing secure backend systems. Familiar with end-to-end application development workflows including requirement analysis, coding, testing, and debugging. A highly motivated team player with strong analytical, problem-solving, and communication skills, eager to contribute to enterprise software development and product engineering in a professional environment.

EDUCATION

B.E. in Computer Science **2023-2027**
Dr. D Y Patil College of Engineering, Akurdi, Pune *CGPA: 8.69/10*

Higher Secondary Certificate (HSC) **2022-2023**
B. P. Patil College of science, Pimpalgaon (B) *Percentage: 88.17%*

Secondary School Certificate (SSC) **2020-2021**
Gautam Public School, Gautamnagar *Percentage: 89.4%*

SKILLS

Languages: Python, C, C++, Java (Basic)
Web development: HTML, CSS, JavaScript, Tailwind CSS, MySQL
AI/ML: Machine Learning Basics, Logistic Regression, Naive Bayes
Libraries: Pandas, NumPy, Matplotlib
Others: Data Structures & Algorithms, OOP, DBMS
Tools: VS Code, Git & GitHub

PROJECTS

Farm Management System
Flask | SQLAlchemy | MySQL ***Nov2025 – Jan2026***

- Developed a secure web-based application to manage farmer records, agro products, and farming data with role-based authentication and an intuitive user interface.
- Designed and implemented a relational database using SQLAlchemy ORM, enabling efficient CRUD operations, data validation, and reliable backend functionality.
- Improved record management by digitizing manual workflows and ensuring secure, scalable database operations
- Enabled customers to browse products and contact farmers directly.

Yukti – AI Engineering Intelligence Platform ***June2026***
FastAPI | React | PostgreSQL | LLMs | RAG | Vector Database

- Built an AI-powered platform to analyze software repositories and generate engineering insights.
- Developed AI agents for architecture analysis, technical debt detection, and roadmap generation.
- Integrated LLM-based workflows to provide intelligent recommendations and documentation.
- **Demo**

CERTIFICATIONS

- **Generative AI Professional**, Microsoft & LinkedIn (2025) – LLMs, Prompt Engineering, AI Workflows.
- **C & C++ Programming Certification** (2023) – C/C++, OOP, Pointers, Data Structures.
- **SQL & Relational Databases(O**ngoing**)**, Cognitive Class (2026) – SQL, Joins, Database Design.

ACHIEVEMENTS

- **Hackverse** - Finalist.
- **Adobe Hackathon-** Adobe Creativity Hackathon participant.
